OIC-VET Programme - Introduction

A visual presentation of the OIC-VET Programme

The Vocational Education and Training Programme for the Member Countries of the Organization of Islamic Cooperation (OIC-VET) is a programme originally designed and developed by the Statistical Economic and Social Research and Training Centre for Islamic Countries (SESRIC) in order to improve the quality of vocational education and training in the public and private sectors with the aim of supporting and enhancing the opportunities for individuals in the Member Countries to develop their knowledge and skills and thus to contribute to the development and competitiveness of the economies and to facilitate the sharing of knowledge between OIC Member Countries.

The Programme supports and supplements the activities of the OIC Member Countries, while respecting the responsibility of the Member Countries for the content and implementation of vocational training. It aims at improving the competencies and skills of the people according to the needs and priorities of labour markets through intra-OIC partnerships at institutional level. The Programme focuses on increasing accessibility and raising the quality of VET, and provides an opportunity for organizations involved in VET to build OIC partnerships, exchange best practices, increase the expertise of their staff and develop the skills and competencies of the participants. The Programme covers the training areas included in the national training programmes in the Member Countries by introducing a transnational perspective in conformity with national priorities of the Member Countries.
