PROPOSALS FOR OIC-SHPA

Turkish Green Crescent Society expresses good will and strong commitment to support the implementation of the Organization of Islamic Cooperation Strategic Health Plan of Action OIC-SHPA 2014-2023

Turkish Green Crescent Society proposes to develop effective governance for reducing risk factors for non-communicable diseases by increasing the involvement of civil Society (P.A.2.2: Promoting Community Awareness and Participation in Preventing, Combating and Controlling Non-Communicable Diseases)

PROPOSALS FOR OIC-SHPA

To achieve the targets of OIC-SHPA (P.A.2.2); alcohol, tobacco and substance abuse should be assessed with special focus as risk factors for non-communicable diseases

According to World Health Organization, Tobacco kills nearly 6 million people and alcohol consumption results in 2.5 million deaths each year in the world. Bearing in mind these facts, addictions and substance abuse should be considered with a particular importance as in the case of Tobacco Free OIC Initiative.

PROPOSALS FOR OIC-SHPA

Civil society initiatives could be developed under the umbrella of OIC like; “Addiction Working Group”, “Public Health Forum” or “Substance Abuse Initiative” similar with “The OIC Independent Permanent Human Rights Commission (IPHRC)” and “Humanitarian Forum (OIC).”

Turkish Green Crescent Society is always ready to share its expertise, know-how and documents to make our world smoke-free, alcohol-free, drug-free and to protect our next generations from all kinds of addictions.

Thank you
for your attention
