

A world map is shown in the background, with the countries of the Organisation of Islamic Cooperation (OIC) highlighted in a yellowish-gold color. The map is centered on the Atlantic Ocean.

Statistical Findings of SESRIC concerning OIC Innovation Infrastructure in light of ATLAS Project

Industrial Property Policies
8 November 2012

OUTLINE

- Very brief introduction of SESRIC
- Atlas of Islamic-World Science and Innovation (AIWSI)
- Current Stance of IPR in OIC Member States
- Lessons from ATLAS

SESRIC *stands for*

Statistical,

Economic and

Social

Research and Training Centre for

Islamic

Countries

Basic mandate of SESRIC is threefold:

- To **collate, process and disseminate socio-economic statistics and information** on and for the utilisation of the Member States
- To **study and evaluate the economic and social developments** in the Member States to help **generate proposals** that will initiate and enhance cooperation among them
- To **organise training programmes** in selected fields geared to the needs of the Member States as well as to the general objectives of the Organization of the Islamic Cooperation (OIC)

BASEIND

- Statistics
 - Basic Social and Economic Indicators Database (BASEIND)
 - SESRIC Motion Charts (SMC)
 - Press Releases from National Statistical Organizations (NSOs) - Archive
 - Member Countries in Figures
- Training Opportunities (TROP)
 - Introduction
 - Become a Member of TROP
 - Management Panel
 - Search
 - Questionnaires
- Institutions
 - Directory of National Statistical Organizations
 - Directory of Universities
 - Directory of Research Institutions
 - Directory of Training Institutions
 - Directory of Central Banks
- Experts
 - Roster of Statistics Experts

Step 1 of 4 - Country Selection

Usage Rule: (Number of countries selected) x (Number of indicators selected) <= 550

Explanation: if you select 10 countries at this stage, you can select a maximum of 55 indicators at the 3rd stage (ie. 10 x 55 <= 550)

Publications of SESRIC

**WHAT IS
AIWSI?**

What is ATLAS project

- Atlas of Islamic-World Science and Innovation (AIWSI) is an international project that aims to provide an insightful overview of science and science-based innovation across the Islamic-world.
- It is an analysis of the opportunities and barriers to further progress across the selected countries of the Organisation of Islamic Cooperation.

Aims of ATLAS

- To identify new opportunities for collaboration,
- To make developments in STI more visible across the OIC and to the wider world,
- It does not aspire to be a comprehensive analysis of every sector.

Middle East and North Africa

Sub-Saharan Africa

Europe and Central Asia

South and East Asia and Pacific

Iran

Nigeria

Turkey

Malaysia

Egypt

Sudan

Kazakhstan

Pakistan

Jordan

Senegal

Azerbaijan

Indonesia

Saudi Arabia

Qatar

**WHAT IS
THE
CURRENT
SITUATION?**

Patent Applications by Office: Residents and Non-residents*

Country	Resident	Non Res.	Total	Year	Country	Resident	Non Res.	Total	Year
Iran	5,970	557	6,527	2006	Tunisia	56	282	338	2005
Malaysia	1,233	5,230	6,463	2010	Lebanon			316	2006
Indonesia	516	5,122	5,638	2010	Azerbaijan	254	17	271	2010
Turkey	3,180	177	3,357	2010	Syria	133	133	266	2006
Egypt	605	1,625	2,230	2010	Kyrgyzstan	134	6	140	2010
Kazakhstan	1,691	273	1,964	2010	Yemen	20	55	75	2010
Pakistan	114	980	1,094	2010	Brunei		42	42	2009
Morocco	152	882	1,034	2010	Mozambique	18	22	40	2007
Saudi Arabia	288	643	931	2010	Sudan	3	13	16	2007
Algeria	76	730	806	2010	Tajikistan	7	3	10	2010
Uzbekistan	370	262	632	2010	Uganda	6	1	7	2007
Jordan	45	429	474	2010	Bahrain			3	2003
Albania		361	361	2009	Burkina Faso	2		2	2010
Bangladesh	66	276	342	2010					

Total Number of Patent Applications in 2010

Distribution of patent among Residents and Non-Residents in OIC

Advantages

- High level support
- Newly designed laws
- Great potential to be exploited

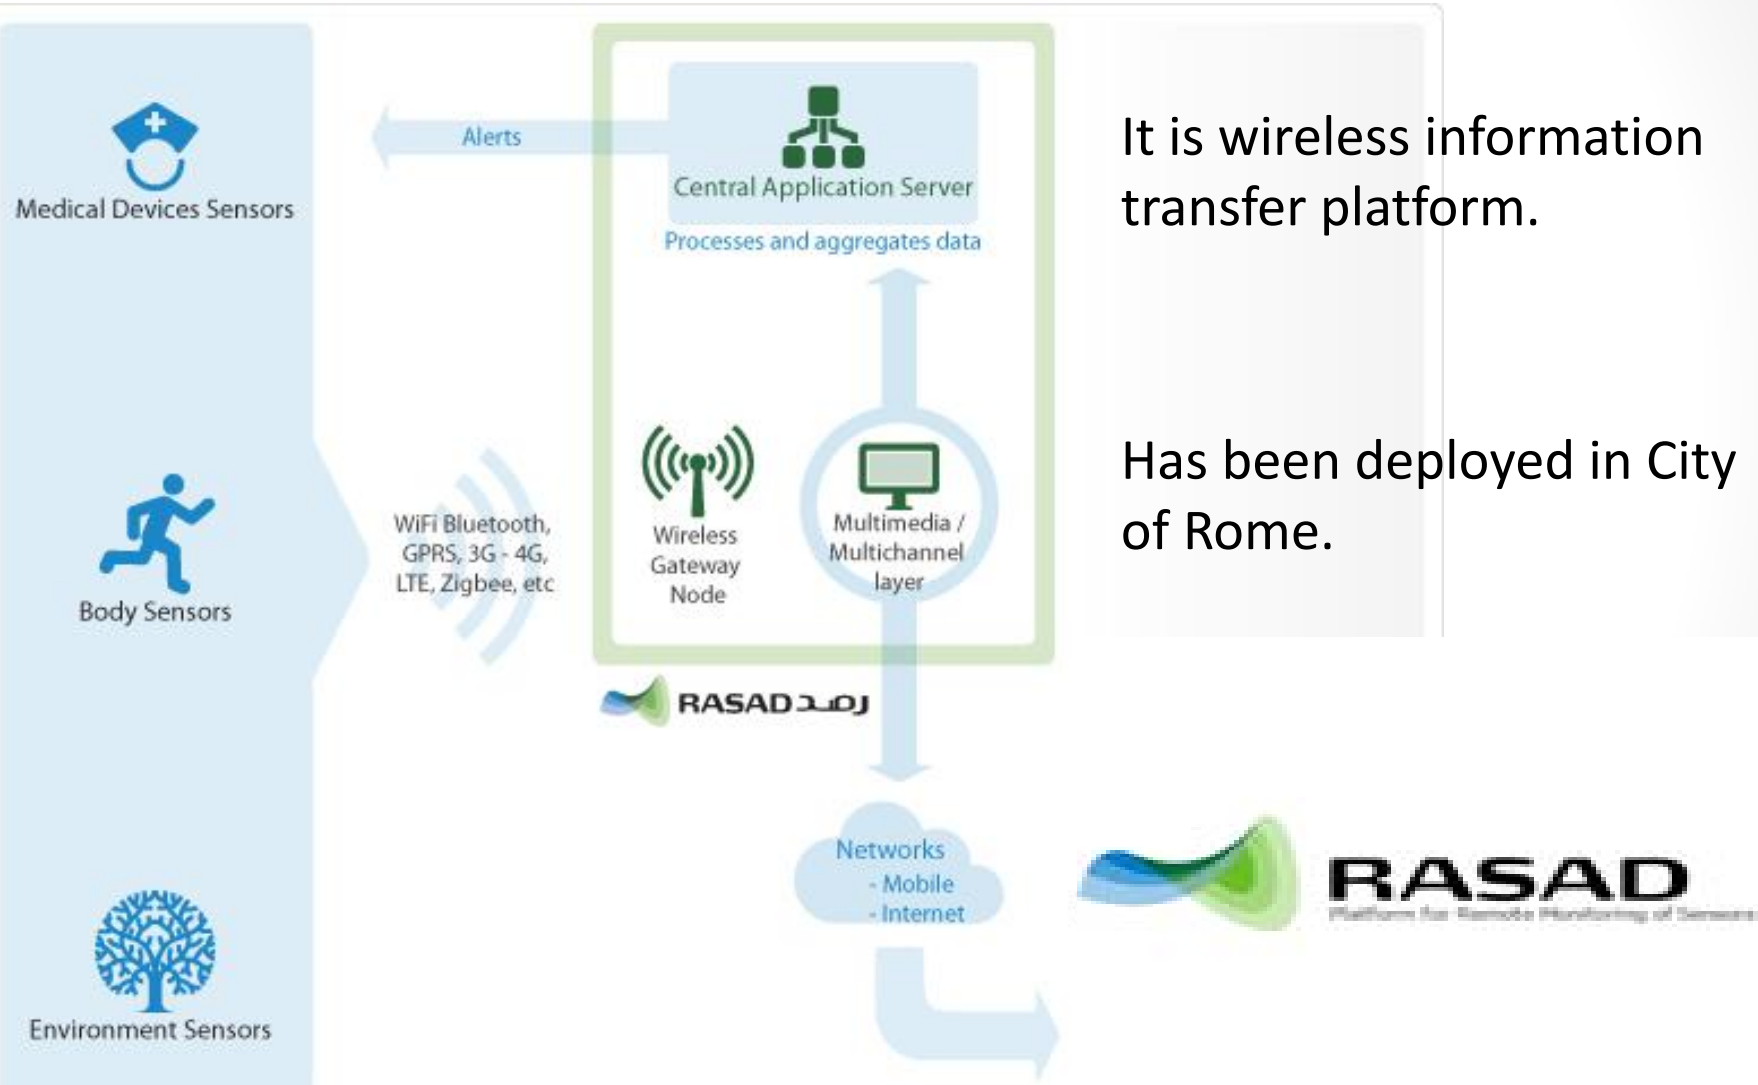

System Design

- Conditions on the ground
- Ministry of Justice Vs. Trade
- Sufficient expertise

Areas of Problem

- Not enough data
- Redesign is needed
- Increase awareness
- Lack of incentives
- Corruption and piracy.
- It also prevents collaboration and interest of multinationals

Transition from Resource to Knowledge

Incentives

- Complex and unclear
- Scientists themselves are not allowed profit in any way. (Indonesia)
- Malaysian Example
- Existing incentives are not big enough.

Support pays off

Typhidot has been developed by USM, with support from Malaysian Government, in 1994

and still on the market.

Commercialization

- There is little understanding of why it is important to patent work or what sort of research is patentable.
- Support for SMEs
- Venture Capitals
- Multinationals

Quarter of a Century of Achievements

how investing in R&D can pay off.

striking success with Egyptian-based research

Collaboration

- IP system should not be very complicated
- Redundancy
- MoU between SESRIC and NATD of Kazakhstan.

Collaboration?

Pearl GTL plant in Qatar

Recommendations

- Utility Models
- Mechanism and Incentives for commercialization
- Collaboration

Thank you for your attention
